

# Top Tips for oil

- Fill your tank *early* in the autumn rather than waiting for winter
- Get more than one quote
- Pay monthly by Direct Debit rather than a lump sum on delivery

- If switching supplier, make sure that you give accurate delivery instructions
- Discounts are available to buying groups. Most savings can be made by ordering with up to five neighbours in the same street or village
- Insulating walls, lofts, tanks and pipes, as well as draught-proofing your home, can help reduce the amount of oil you need to use each year
